

# PENTAGON FREIGHT SERVICES OPENS BRAND NEW WAREHOUSE FACILITY IN ROTTERDAM

We are pleased to announce the opening of our brand-new distribution and warehouse facility in the port and industrial area of Botlek, Rotterdam. Strategically located within the largest seaport in Europe, with swift links to major European highway and road networks, our new facility offers customers additional storage opportunities, and access to one of the premier transport hubs in Europe.

A 5,300 sqm state-of-the-art warehouse with ten self-levelling loading docks, supported by proven warehouse management systems, opens-up extra storage capacity for our customers to strengthen their end-to-end supply chain solutions. It incorporates the latest technologies, materials and techniques, including solar panels and efficient LED lighting, to mitigate negative environmental impacts and reduce costs for our customers.

With a focus on storage, multimodal, deep sea and short sea business, the new facility complements our existing airfreight operation at Amsterdam airport.

*"I am delighted to announce the opening of our new Rotterdam operation. This new warehouse centre at Rotterdam marks an important step in our plans to enable trade flows across Europe. This best-in-class facility will provide the operational flexibility and capacity our customers need to ensure their supply chains become even more efficient and effective with direct access to a central hub linking rail, road, inland barging, deep sea and short sea. This strategic expansion will help us strengthen the already exceptional service that we offer our customers in the Netherlands and the wider EU."*
